(1) Choose the "Brake" option for use in vertical applications. (W/ brake type is not available for Lead 20) (2) Controllers are shipped with preset parameters for each type. Data storage batteries are outside the scope of RoHS Directive.
(3) A noise filter is required for this product. When the customer is purchasing the noise filter separately, please select "none". Be sure to install a surge absorber on the primary side of a noise filter. For details, please see the Instruction Manual.

Ordering Example: RSH106B - C22A - N - F1 - 3 - 400

Note: Power interruption circuit is not provided in this controller in order to provide maximum flexibility for customer specific safety scheme. Please be sure to provide an external power interruption circuit and form an emergency stop circuit. For Circuit examples, see P503.

Allowable Static Moment

- Moment Diagram

Max. Velocity (mm/sec)

Type	Lead (mm)	Stroke (mm)					
		150~550	600	650	700	750	800
RSH1	06	360	324	270	234	216	180

	20	780~1200	1080	900	780	720	600

When the stroke is 600mm or more, the resonance of ball screws may occur according to the operating area (critical speed). In that case, reduce the operation speed by referring to the Max. Velocity shown in the table above.

For optional items, see P 507. It is more economical to order the optional items as alterations than purchasing them individually.
Entering point data requires the handy terminal or the support software.
An I/O Cable is required for Parallel Communication I/O Control.
