• Features of HBLST5-P (with "Thin Bracket Hole Position" Alteration applied)
For this bracket, since the staggered arrangement of mounting hole positions avoids screws from interfering with each other, each of the bracket side faces can be easily assembled vertically with the mating extrusion side face through the extrusion slot.

⚠ Screws for black anodized brackets are made of HCBMTB (Trivalent Chromate Black) on P780.
⚠ Included Screw is not RoHS compliant when -SET, -SEU or -SEP is specified for any bracket other than black anodized ones.

■ **Features:** Thin Brackets with tabs to fit in slots of extrusions. Since the tabs serve as the rotation stoppers for brackets when tightening, work efficiency is improved.

■ **Thin Stainless Steel Tabbed Brackets**
