

RUBBER GRINDING STONES

RUBBER GRINDSTONE WITH SHAFT FOR MOLD (WITH ABRASIVE GRAIN) DAITEC / HIGH-SPEED ROTATION TYPE / DIAMOND

■ **Application** Rubber grindstone with shaft that can be used for mold maintenance.

■ **Rubber Grindstone with Shaft for Mold (with Abrasive Grain) Daitec**

M-RGS

■ **Features**

- Made in Japan.
- The abrasive grain provides superior grinding capability.
- Highly effective for hard materials such as tempered and quenched materials.
- All shafts are ϕ 3 and length 30 mm.
- Applicable materials: Iron / Aluminum / Zinc / Nickel / Titanium / Copper

Allowable rotational speed (rpm)	Part Number	Grindstone dia.	Grindstone length	Shaft dia.	Grain size (#)	Unit Price

■ **Rubber Grindstone with Shaft for Mold (with Abrasive Grain) Diamond Daitec**

M-RGSD

■ **Features**

- Made in Japan.
- The diamond abrasive grain provides superior grinding capability for glass molded products.
- All shafts are ϕ 3 and length 30 mm.
- Applicable materials: Cemented Carbide / Carbon Steel / Glass / Ceramics
